Education

State University

Bachelor of Science in Computer Science

Aug, 2023 – May, 2026

Houston, TX

Relevant Coursework

- Data Structures
- Computer Networks
- WAN Technologies
- Database Management
- Network Management
- Adv Tps in Sfw Eng
- Operating Systems
- Computer Architecture

Experience

Sedgwick

Insurance Adjuster

December 2022 – May 2023

U.S. Virgin Islands

- Managed **20–30 active claims per week** across auto, workers' comp, commercial property, and liability **by** maintaining audit ready files and proactive stakeholder updates, **resulting in** on time processing and fewer documentation gaps.
- Reduced claim cycle time **15% by** improving intake “data layer” quality (cleaner intake data, tighter documentation standards) and automating follow ups, **resulting in** fewer bottlenecks and faster claim progression.
- Strengthened coverage and settlement decision accuracy **by** validating evidence, reconciling discrepancies, and documenting clear rationale, **resulting in** more consistent outcomes and smoother handoffs between teams.
- Negotiated fair, compliant settlements by analyzing policy coverage, damages, and liability exposure, resulting in faster resolutions and improved customer satisfaction.

U.S. Navy

Aviation Fuels Quality Assurance

February 2015 – February 2023

Global

- Led quality and safety compliance for a **50 member fuels operations unit** by enforcing standards, running inspections, and coaching consistent execution, resulting in reliable performance during high tempo operations and fewer compliance gaps.
- Maintained **100% accurate** operational and safety logs by auditing documentation daily and tightening verification steps, resulting in audit ready records and less rework from errors.
- Detected and resolved fuel quality performance issues by conducting aviation fuel quality checks, running specification based tests, and initiating corrective actions (filtration/purification) when results were out of limits, resulting in fuel staying within specs and reduced operational risk.

Projects

Salon803 | *Full-Stack Business Website*

- Launched Salon803.com and improved SEO/social sharing with structured data, Open Graph, and dynamic metadata (106 pageviews, 57s avg session, 56% bounce).
- Built a mobile first responsive UI with tap to call/tap to navigate deep links for a mostly mobile audience (74% of users).
- Automated applicant intake with Google Apps Script confirmation emails and owner alerts, reducing manual follow up and speeding responses.

Machina | *Enterprise Network Deployment*

- Designed a multi router **OSPF** topology with **dual path failover** and tuned costs for automatic rerouting during link outages.
- Deployed structured **LAN subnetting/VLANs** with gateways and switch uplinks across **6 divisions** to control broadcast domains and scale cleanly.
- Built a secure perimeter by tying **core + WAN edge routing** into **firewall segmentation/inspection** to enforce controlled, policy based access.

Customer Invoice Database | *MS SQL Server (MSSQL)*

- Built a normalized relational schema for customers, invoices, and payments using linked SQL tables.
- Wrote optimized queries to pull invoices, calculate balances, and generate customer summary reports.
- Enforced data integrity with primary/foreign keys and validation rules to improve query reliability. .

Technical Skills

Programming Languages: C++, JavaScript, TypeScript, SQL, HTML, CSS

Libraries and Tools: Bootstrap, Django, Git, GitHub, Docker, VS Code, Netlify, Jira, Miro

Databases: MySQL, Supabase (PostgreSQL), Microsoft SQL Server (MSSQL)
