Secret Security Clearance

Professional Summary

Results-driven technical professional with hands-on experience troubleshooting systems, resolving data issues, and supporting high-volume operations. Skilled in diagnosing problems, improving workflows, and maintaining accurate documentation across fast-paced environments. Brings a strong foundation in systems, data analysis, and technical support, with a proven ability to adapt quickly and deliver reliable solutions. U.S. Navy veteran recognized for discipline, accountability, and the ability to perform under pressure while maintaining high standards of accuracy and professionalism.

Experience

RideTEGO

Houston, TX

Software Developer Intern

Mar 2026–Present

- Built a full-stack corporate travel management platform using Next.js, React, TypeScript, Node.js, Express, Supabase, PostgreSQL, and Tailwind CSS, supporting trip requests and approval workflows.
- Developed and maintained 9 REST API endpoints for authentication, user profiles, manager lookup, and travel request operations.
- Designed a PostgreSQL/Supabase data model with role-based access, 6 approval statuses, indexed query fields, and JSONB booking data for flights, stays, and travelers.
- Implemented 10+ frontend pages and reusable React components for dashboards, approvals, trip management, authentication, and booking workflows.
- Integrated third-party APIs (Google Places Autocomplete and flight search services) and implemented validation, error handling, and data normalization to improve system reliability and user experience.

Sedgwick

U.S. Virgin Islands

Insurance Adjuster

2022–2023

- Managed 50+ active cases while maintaining accurate documentation, records, and compliance standards under strict deadlines.
- Analyzed case data to identify discrepancies, validate information, and ensure timely issue resolution.
- Improved workflow efficiency by 15% by identifying process gaps and implementing corrective actions.

U.S. Navy

Various Locations

Quality Control Analyst

2015–2023

- Maintained accuracy and integrity of mission-critical data by monitoring systems and resolving discrepancies across operations.
- Documented processes, system activity, and audit logs to ensure compliance and accountability.
- Operated in high-pressure environments requiring precision, reliability, and adherence to strict procedures.
- Collaborated across teams to resolve operational issues and maintain continuity of critical systems.

Technical Skills

Programming & Development: JavaScript, TypeScript, Node.js, Python, C++, HTML, CSS

Data & Databases: SQL, MySQL, Data Analysis, Data Validation

Systems: Windows OS, Windows Server, Virtual Machines, Microsoft Office 365

IT & Networking: Troubleshooting, Active Directory, System Monitoring

Tools: Git, GitHub, VS Code, Jira, Microsoft Excel

Core Skills: Problem Solving, Communication, Documentation, Team Collaboration, Time Management

Projects

Active Directory Homelab

Windows Server, Active Directory, PowerShell, Virtual Machines

- Built and managed a simulated enterprise identity environment using Windows Server and virtual machines.
- Configured Active Directory users, groups, organizational units, permissions, and access controls.
- Created and tested Group Policy configurations to enforce user and system security settings.
- Practiced troubleshooting user login issues, permission errors, account access problems, and policy conflicts.
- Used PowerShell to automate basic administrative tasks and improve efficiency in user and system management.
- Maintained documentation, system logs, and configuration notes to support troubleshooting and audit readiness.

Incident Detection & Response Dashboard

React, JavaScript, SQL

- Built a dashboard to track system incidents, monitor KPIs, and support real-time performance analysis.
- Designed SQL data models to store and analyze operational data, system events, and incident trends.
- Developed metrics including response time, resolution time, and SLA tracking to support faster issue resolution.
- Improved visibility into recurring incidents and enabled stronger root cause analysis.

Corporate Workflow Application

React, Express.js, Supabase

- Built dashboards tracking 100+ workflows monthly to improve reporting, visibility, and operational control.
- Implemented data validation logic to ensure consistency and reduce errors across systems.
- Improved system reliability through error detection, workflow monitoring, and process optimization.

Education

Texas Southern University

Houston, TX

Bachelor of Science in Computer Science, Cum Laude | GPA: 3.6/4.0
